

CSE2115 Peer assignment #1

Connor Spruit

Dominykas Vaskevicius

Technische Universiteit Delft

1. Version

We listened to **Thomas Overklift Vaupel Klein** in Flux hall B, covering the second year software project

2. Problem statement

Lorum ipsum

3. Identifying stakeholders

- **students** have to find project proposals and sign up for teams
- **clients** have to submit project proposals and select teams
- **(co-)coordinators** have to accept or reject proposals, manage team formation and coordinate (under more) TA and supervisor assignment
- The **program coordinator** has to accept or reject students based on entry requirements and exemptions
- **teaching assistants** have to find their assigned group and be able to help the team
- **supervisors** have to be able to see everything the team is doing

4. User stories

4.1. Students

- I want to be able to view available projects
- I want to be able to contact my supervisors or TA's
- I want to be able to show interest in project proposals so I can form a group with other interested students
- I need to be able to see my feedback and the associated rubrics and grades
- I want to be able to sign up with the team we already formed
- I want to be able to freely & anonymously express feedback about my teammates to my supervisor
- I need to be able to fill in and sign the contract
- I want to be able to collect my payment if applicable
-

4.2. clients

- I want to be able to submit a project proposal

- I want to be able to pick which team does my project if multiple teams apply
- I want to be able to see how the project is going
- I want to be able to fill in, review and sign the contract(s)
- I want to be able to view and pay any payments to the university and students in a easy way
- I want to sign a contract so i'm protected by law

4.3. (Co-)Coordinators

- I want to be able to manage all the contracts that need to be signed in one place so I don't have to keep mailing pdf's around.IP •
- I want other parties to be able to submit their feedback to me so we can take all opinions into account and be prepared for the grade discussions
- I want to be able to export all grades so I can import them in mytudelft
- I want to be able to view submitted project proposals and to be able to accept or reject them

4.4. Programmecoordinator

- I want to be able to view applying students and if they meet the entry requirements

4.5. supervisor

- I want to be able to see what my team is doing

5. Refining requirements

Lorum Ipsum

6. Reflection

6.1. A: Is an interview the best way to elicit requirements?

Bla die bla yeah it's good for getting a lot of info quick but it's not the best because not in depth, 1 interview is stupid and things can be contradictory

6.2. B: suggest an alternative or addition to interviewing as elicitation.

for a large body of ppl ofc questionnaire bla bla. observing people doing what they do will be way better but it will take way more time
